

SEPTIC SQI

ANTISEPTIC DISINFECTANT FOR INSTANT HAND HYGIENIZATION (ALCOHOL GEL).

PROPERTIES:

SEPTIC SQI is an antiseptic for washing and disinfecting hands, composed of disinfectants based on alcohol, germicides, virucides, skin softening substances, emulsifiers, preservatives and stabilizers.

SEPTIC SQI is an excellent quality disinfectant for washing hands without using water. In its composition SEPTIC SQI has a strong disinfectant action, combined with skin softening substances, allowing a thorough cleaning, fighting bacteria that normally develop on the skin. Regular use of this product makes it possible to comply with hygiene rules, less skin irritation and prevents cross contamination. You do not need to clean the excess product, as it evaporates normally.

APPLICATIONS:

SEPTIC SQI is intended to be used in all areas of public health, and in all food handling locations to prevent cross-contamination in school kitchens and cafeterias, nursing homes, kindergartens, restaurants, breweries, cafes, hotels, firefighters, hospitals, etc. It should also be used in accordance with the recommendation of the WHO (World Health Organization) for the prevention of the H1N1 virus and the COVID-19 virus, for the disinfection of hands and all places susceptible to contamination. (door handles, computer keyboards, work desks, handrails, etc.)

METHOD OF USE:

SEPTIC SQI is used directly on the hands, placing a small amount and rubbing the entire surface of the hands, until complete evaporation. Do not rinse. SEPTIC SQI must be used before handling any type of food, to avoid cross contamination. In places susceptible to contamination, disinfectant should be applied whenever deemed necessary.

PHYSICAL AND CHEMICAL PROPERTIES:

ASPECT:	Liquid - Gel type
COLOR:	Blue.
ODOR:	Characteristic to alcohol
DENSITY:	0,880 Kg/hm ³ ± 50 gr.
